Outstanding Performance & Lasting Contribution

PROJECT DETAILS

Reltime Admin

RelTime is a decentralized Cryptocurrency **Investing Web App**. It is used to **Lend and borrow money** directly to or from another RelTime user

Role : Front End Developer

- Integrated Redux for state management, **optimizing application performance** and reducing load time by 47%.
 - In this Project, my responsibilities is to create Admin Panel and Sub Admin Panel
 - Designed a responsive user interface using Bootstrap, which led to a 26% decrease in bounce rate.
 - Enforced code quality across the React codebase with ESLint, **resulting in a 21% reduction** in code review time and improved overall codebase health
-

Reltime Website

Reltime's vision is to make Web3, decentralized finance the new normal for billions of people and millions of businesses worldwide. The decentralized world is not a dream, but a reality today.

Role : Front End Developer

- Developed and implemented **React components using React Router** to enhance navigation UX.
 - Create and deliver **highly efficient application-based solutions** to optimize the company's complaints handling process.
-

Make My Slot

We developed a **user-friendly ticket-booking app**, utilizing modern technologies and APIs. Implemented seamless ticket search, selection, and booking functionalities with real-time availability updates. Ensured robust error handling and performance optimization for an **enhanced user experience**.

Role : Front End Developer

- Developed and implemented React components using React Router to enhance navigation UX.
 - Oversaw a team of Seven developers, orchestrating the creation of a user interface powered by **Redux** and **Redux Toolkit**
 - Integrated third-party libraries like **Axios** and React Router DOM, optimizing data fetching and navigation, resulting in a seamless user experience.
-

Hydrafacial

A hydrafacial is one of the most powerful, non-invasive skin resurfacing treatments available today. It combines cleansing, exfoliation, extraction, hydration, and antioxidant protection. **Content stack used for delivering content** to the website. Algolia is used for Search optimization.

Role : Front End Developer

- We made sure that our app looks and **works well on different devices like phones and computers**. No matter what device you use, our app will still be easy to use
- We're using **Contentstack to manage our content and GraphQL** to get data from the server. This helps us organize content easily and get the information we need quickly.
